

## **Background Information on the Destruction of Ballots in Broward County Florida In the 2016 Congressional Primary Between Debbie Wasserman Schultz and Tim Canova**

In November of 2016, [journalist and documentary filmmaker Lulu Friesdat](#) filed two public records requests with the Broward County Supervisor of Elections (BCSOE) office requesting documents from the August 30<sup>th</sup> primary election, in the race between Debbie Wasserman Schultz and Tim Canova.

The public records requests are included in this packet. One was for “an electronic copy of all Ballot Image Files generated by all scanners used by Broward County to count the vote from the August 30, 2016 Primary Election...” and one was a much more comprehensive request list that included a videotaped 100% hand recount of 12 precincts, as well as sign-in books to verify the number of voters that voted, chain of custody documentation, invoices for ballots, blank ballots, communications and contracts with the Broward County voting machine vendor ES&S, and documents from BCSOE’s Election Management System.

Ms. Friesdat was interested in these records because of a statistical analysis that her team had done indicating there were inconsistencies in the results of the election.

The county did not fulfill the public records requests, responding that they did not capture ballot image files, and don’t utilize poll books. The office was unwilling to have a ballot inspection video taped or photographed.

Ms. Friesdat was joined in her quest for these documents by Tim Canova, one of the candidates in the race; and on March 10, 2017 they filed a third public records request on the advice of Canova’s attorney Leonard Collins. That request, public records request #2077, was to view and scan original ballots from the election and for supporting documents. BCSOE office did not provide many of the documents in this public records request, and on June 7<sup>th</sup> Canova filed a lawsuit against the office. Ms. Friesdat is an expert witness in that lawsuit.

Due to the lawsuit, Ms. Friesdat was allowed to schedule an inspection of the original ballots for November 1<sup>st</sup> and 2<sup>nd</sup> 2017. When she arrived at the Voting Equipment Center in Broward County she was informed that no original ballots were available, and staff at the BCSOE office instead showed her digital scans of the ballots. Previously they claimed no digital ballot images were captured.

In court on November 6<sup>th</sup>, the attorney for the BCSOE office stated that the county had destroyed the original ballots after 12 months, despite federal retention laws requiring that federal ballot be kept for 22 months. The Supervisor of Elections Brenda Snipes, personally signed off on the order to destroy the ballots stating, “I hereby certify that the records to be disposed of are correctly represented below, that any audit requirements for the records have been fully justified, and that further retention is not required for any litigation pending or imminent.” When the ballots were destroyed on September 1st, 2017, litigation was pending.

[Analysis](#) by Ms. Friesdat’s team shows that there are almost 1000 more cast ballots in the election than voters who voted. These discrepancies cannot be reconciled now, since the original ballots in the race have been destroyed.

Lulu Friesdat is an Emmy award-winning journalist and documentary filmmaker. Her work focuses on the issue of election integrity in U.S. elections. Her [investigation](#) into the discrepancies in Racine County Wisconsin during the 2016 presidential recount led to the decertification of the voting machines in use there. Recent articles include coverage of the Georgia 6<sup>th</sup> congressional district special election, the DEF CON voting machine hacking convention, and a ballot initiative to restore voting rights to ex-felons in Florida. Her television news assignments include producing election coverage for MSNBC and editing with the CBS Evening News and Good Morning America. She received a Best Documentary award for directing her first feature-length documentary, *Holler Back: [not] Voting in an American Town*: a film that explores systemic issues in our elections that discourage participation.

**From:** Lulu Friesdat  
**Sent:** Friday, March 10, 2017 2:01 PM  
**To:** Dolly Gibson  
**Subject:** Public Records Request

Dear Dolly -

This is a public records request under Chapter 119, Florida Statutes, relating to the production of records from the August 30, 2016 Democratic primary in the Broward County portion of Florida's 23rd Congressional District.

Records requested:

1. We seek to examine all the Broward County ballots of Florida's 23rd Congressional District from the August 30, 2016 Democratic primary as they are stored. We request they all be

brought to the same location, with as minimal disruption to their current state as possible. We specifically request that the Supervisor of Elections office not re-count or sort them prior to our meeting.

2. We seek to electronically scan 100% of the ballots cast in twelve precincts of our choosing from the above-stated election. We request that both sides of the ballots be scanned in PDF format.

3. We request 100% of all the ballots from the August 30, 2016 Democratic primary in the Broward County portion of Florida's 23rd Congressional District be produced: including early voting, election day voting, mail-in voting, disabled voting, provisional or affidavit ballots, military or overseas ballots, void ballots, write-in ballots and any other form of cast ballot not mentioned.

4. We will rent or purchase a scanning machine and have it brought to the location where the ballots are stored. Please advise us if you have any specifications as to the type of scanning machine that must be utilized. We have located an off-the-shelf scanner that can be fed quickly to minimize the time and effort of your staff. We may request to add a second scanner and scanning team, to expedite the process. We understand that the scanning needs to take place on your premises.

5. We will pay for the scan of the precincts in advance by providing the total number of ballots that we intend to scan, or paying for the staff time / per day in advance. (Staff costs were quoted to us as one senior staff member at \$48/hour, and other junior staff members at a lower cost per hour.) We will choose the precincts that we wish to scan after viewing the complete set of ballots. We will provide each precinct as the last one is complete. We do not anticipate any cost to this part of the records request besides the staff time. If there are other costs that will arise, please notify us immediately. Since we are only scanning twelve precincts, we hope the job can be completed in one or two days at most.

6. We understand the ballots must be handled by your staff. We will provide at least 2 volunteers for each scanning team, to watch the scanning in close enough proximity to view how each ballot was cast. Observers will be respectful of the process and not impede it in any way. Observers may ask for the process to be temporarily paused or stopped if they are concerned about an issue.

One of the volunteers will call out the votes to least 2 volunteers who will operate laptops attached to each scanner. Those volunteers will verify that each ballot has been scanned correctly. That is a minimum of 4 volunteers per scanning team. Additionally we will have individuals such as myself, our attorney, Tim Canova, and another professional present. We understand that no one can touch the ballots except your staff. To the extent that we have a

question about a particular ballot - we will request that it be set aside for further examination. Volunteers or observers may ask for a ballot to be re-scanned if it did not scan correctly.

7. We request to have the following question answered at the soonest date possible in order for us to adequately prepare for the scanning, and make sure that we choose a scanner that is appropriate for the ballots:

- a) Is there a unique identifying number on each ballot?
- b) What size are the ballots?
- c) Have they been stored together by precinct, or are the vote-by-mail and other ballots like military and provisional stored elsewhere?
- d) Are they well-labeled by precinct?
- e) How much time will it take to locate each precinct?
- f) What is their general location? For example are they all in a warehouse?
- g) Are they in neat stacks, or in a more uneven state, from having been in a ballot bag for example?

8. We request a physical copy of a sample ballot from the August 30th, 2016 Democratic primary of Florida's 23rd Congressional District as soon as possible to help us prepare for the scanning.

9. We request to retain the digital scans of the ballots on a hard drive, USB stick, or laptop. We will make a duplicate backup of the files on the premises. We will provide a copy of the digital scans to your office if you would like one. We reserve the right to add a layer of encryption to the digital scans to insure that the images cannot be altered. We would give your office whatever key was necessary to access the images.

10. Once our team is present, we request that for each precinct, the ballots be divided into four stacks. Stack 1: Debbie Wasserman Schultz votes; Stack 2: Tim Canova votes; Stack 3: Void ballots; Undervotes; Overvotes; write-in candidates; Stack 4: any ballots that need further examination or follow-up. We request each stack be scanned and confirmed scanned accurately in batches of 25. We believe this will be the quickest way to scan and confirm the accuracy of the scans. At our discretion, we request the option to have the ballots for each precinct scanned without sorting if the outlined process becomes too time-consuming.

11. If there is no unique identifying number on each ballot, we request that a temporary unique identifying number be placed on each ballot with a sticker, immediately prior to its being scanned. We can provide those numbers on a roll so that the numbering process goes quickly.

12. We request a copy of the poll tapes from each of the machines from each of the precincts that we select to scan.

13. We request to videotape the scanning process.
14. We request the complete digital file(s) of the EViD of all the voters who voted in the August 30, 2016 Democratic primary in the Broward County portion of Florida's 23rd Congressional District, so that we can verify that the number of ballots for each precinct is complete. We request this file or files in the form or forms in which it is ordinarily maintained including any and all metadata associated with the file(s), as well as a form that is easy to read for anyone not familiar with the software, or not possessing the software.
15. We request a copy of the envelope with the signature of each vote by mail ballot in the precincts that we scan. We request a copy of each fax of the military and overseas ballots in the precincts that we scan, and the duplicated ballot with the matching serial number if one was created.
16. We request a copy of each provisional ballot in the precincts that we scan, as well as any information pertaining to whether the provisional ballot was counted or not and why.
17. We request documents confirming that the number of people who voted matches the number of ballots in each precinct.
18. We request chain of custody documentation and seals showing that the ballots were secure at all times following their being cast or received, up until the time of the Public Records Request viewing. We request written manuals or emails describing the chain of custody protocols of the Broward County Supervisor of Elections Office and documentation that they are being followed in accordance with the laws of the State of Florida.
19. We request an electronic copy of the Cast Vote Record (CVR) of the vote from the August 30, 2016 Democratic primary in the Broward County portion of Florida's 23rd Congressional District, in the form or forms in which they are ordinarily maintained including any and all metadata associated with those files.
20. We request to know all versions of ES&S software running on the voting machines for the August 30th 2016 primary.
21. We request that all information be provided digitally on hard drives or flash drives that we can provide to your office, or on a low cost medium, such as a CD disk. Please do not photo copy paper documents, but instead scan and provide them digitally.
22. All of the above records must be provided in the native format or medium in which they are maintained. See F.S. 119.01(2)(f).

For purposes of this request, the term "records" or "materials" includes all tangible or intangible things of every nature that contain information, including, without limitation, agreements, analyses, appointment records, audio recordings (whether transcribed or not), bills, books, books of account, charts, checks, communications, computer cards, computer printouts, computer programs, contracts, correspondence, diaries, disks, diskettes, drafts, drawings, electronic mail, including instant message, text messages and social media such as, but not limited to Facebook and Twitter postings, financial statements, forms, graphs, handbooks, invoices, itemizations, journals, leases, ledgers, licenses, manuals, maps, memoranda, minutes, notes (whether handwritten or otherwise), opinions, orders (of courts or administrative officers or awards in arbitration), permits, photographs, plans, pleadings, proofs, publications, receipts, recordings, records, reports, sketches, specifications, spreadsheets, statements, studies, summaries, tapes, telefaxes, telegrams, telexes, other telecommunication materials, video recordings, writings of every kind, and all other data compilations from which information can be obtained or translated through detection devices or otherwise into reasonably usable form, including all such items in the possession, custody, or control of any of your attorneys, accountants, officers, employees, or agents wherever located.

The subject records should be produced as quickly as possible. If production of any of the requested records will require in excess of seven days from the date of this letter, please produce all records that you can locate responsive to the request as quickly as possible, and additional production(s) can be arranged for later dates.

If any of the requested records cannot be produced because you feel they are not subject to inspection under the applicable law or under any claim of privilege, please preserve these records, and provide us with a statement identifying the records (by date and nature) and the statutory/legal basis for not producing them. If any records have been lost, destroyed or rendered inaccessible, please provide us with a statement identifying the date and nature of those records.

We understand there may be a reasonable charge for the records production. We assure that payment will be made promptly if an invoice is provided. Please notify us immediately of what these reasonable charges will be.

Please contact me at the above email, or at \_\_\_\_\_, regarding scheduling, payment, delivery, other logistical issues, the clarification or prioritization of any of these requests, or with any questions or concerns.

Thank you for your prompt attention to fulfilling this request. The Supervisor of Elections' office has been helpful, and I continue to be grateful for your professionalism and cooperation.

Kind Regards,  
Lulu

**Subject:** Freedom of Information request for hand count and documents

Hi Dolly -

Per our phone conversation and the Florida freedom of information law: Article I, section 24 of the Florida Constitution, and chapter 119, F.S., I am requesting an opportunity to inspect or obtain copies of public records. I will follow up with a phone call.

Here is a list of our requests:

- 100% Paper Ballot Hand Count of 12 Precincts of Our Choosing from the August 30th Democratic primary in the 23rd district of Broward County. The race is between Debbie Wasserman Schultz and Tim Canova.
  - We want to do a 100% hand recount of 12 precincts from the August 30th Democratic primary in the 23rd district of Broward County.
  - We are requesting 100% of all the ballots from each precinct, including early voting, election day voting, mail-in voting, handicapped voting, provisional or affidavit ballots, military or overseas ballots and any other form of ballot not mentioned.
  - We understand that the count needs to take place on your premises and be conducted by your staff.
  - We would like to have observers who can watch each ballot be counted and keep track as the count takes place.
  - We would like to video tape the process.
  - We would prefer to pick the 12 precincts closer to the time of the hand count.
  - Per our conversation, we would like the hand count scheduled for the first or second week of December.
- We are requesting the sign in books and other official paperwork regarding total ballots received, so that the total number of voters can be verified with the total number of votes reported. We should be able to verify this for each of the twelve precincts.
- We are requesting the chain of custody documentation and seals showing that the ballots were secure at all times following their being cast or received up until the time of the hand count.
- We are requesting an electronic copy of all Ballot Image Files generated by all scanners used by Broward County to count the vote from the August 30, 2016 Primary Election, in the race between Debbie Wasserman Schultz and Tim Canova in the form or forms in

which they are ordinarily maintained including any and all metadata associated with those files.

- We are requesting an electronic copy of the Cast Vote Record (CVR) for the vote from the August 30, 2016 Primary Election, in the race between Debbie Wasserman Schultz and Tim Canova, in the form or forms in which they are ordinarily maintained including any and all metadata associated with those files and including the file name for each corresponding Ballot Image File.
- We are requesting an electronic copy of any invoices that show how many ballots were purchased for the August 30<sup>th</sup> primary.
- We are requesting to see the blank ballots that are remaining, or emails and documents pertaining to their destruction, recycling or shredding.
- We are requesting electronic copies of all contracts with ES&S.
- We are requesting electronic copies of all email or written correspondence with ES&S.
- We are requesting the manual (electronic or hard copy) for the latest software that is running on the current voting machines and the manual for the machines themselves. Including all types of machines that are in use in the county.
- We are requesting electronic copies of the Election Management System “EMS”, known as the ES&S audit logs for the central tabulator data files involved in either the setup and/or execution of the August 30, Primary election, and the election immediately prior to that election.
- We are requesting a copy of the “File Allocation Table” on each Election Management System ES&S server and if not available plain text file with the following command on each disk drive of each server:  

```
C:\> dir *.* /s > c:\EMSlist.txt
```

 (C: replaced by D: if a second drive exists, by E: if a third drive exists, etc).
- All of the above records must be provided in the native format or medium in which they are maintained. See F.S. 119.01(2)(f).
- We would like to get the digital ballot images, and do the hand count as soon as possible, even if the other requests require more time to fulfill.

#### COSTS

- We understand that we will need to pay the \$48/hour rate of a member of your staff, plus one assistant. Please let us know the charge for the assistant. If there are other costs, please notify us immediately.

- Since there is no printing involved for the ballot images, we are hoping that the cost for this would be the cost of a digital disk or flash drive plus an hour or two of a staff member's time to copy the files and send the disk or flash drive. We would hope this would be under \$100. We would like to receive these digital ballot images at your earliest convenience.
- Please give us an approximate cost for the other items.
- Please execute all requests in the most cost-effective manner possible.
- Let us know if we can help in any way.

Thank you so much for all of your help in preparing and fulfilling this request. The Supervisor of Elections' office has been friendly, helpful, and efficient and we are very grateful for your professionalism.

Kind Regards,  
lulu
